

FINN

Women in Tech Intern (f/x)

Munich or Remote

FINN makes mobility fun and sustainable. With a flexible car subscription, we bring a true e-commerce experience to car ownership and offset all CO2 emissions along the way. Join our fast-growing startup to build the most popular auto e-commerce platform. We work with the best car brands in the world and are backed by leading global investors.

Your Role

With this program, we are primarily targeting women interested in Software Engineering to join our team and gain professional exposure to this exciting domain. As a participant in our Women in Tech Internship program, you will work with us on developing software and systems, as well as managing thousands of vehicles. You can choose between 5 tracks to develop your coding skills and learn about product development in a high-growth tech startup.

Your Benefits

- You have the flexibility to work either in our Munich office or remotely within 3 hours of the Munich time zone (CET/CEST).
- With massive growth potential, FINN allows you to quickly develop and succeed in a highly motivating startup environment with purposeful projects in cross-functional teams.
- Excellent monthly salary of 2,800€.
- Discounted qualitrain membership enabling you to be active in various gyms within Germany.
- Our open, modern office in the middle of Munich is known for loads of fun with amazing colleagues and frequent team events.
- You want to drive your own car with FINN? – Get one with our employee discount program.

Available Tracks

- **Frontend Development:** Take the first steps in web development, ship features, or build new landing pages from scratch, with your team.
- **Backend Development:** Help our team with daily challenges by automating processes and learn more about the software infrastructure.
- **Data Engineering:** Support the design, implementation and maintenance of a state-of-the-art data architecture for our teams to facilitate our decision making with our easily available data.
- **API Technical Writing:** Create useful and engaging API and other developer-facing documentation using docs-as-code approach.
- **Business Automation:** Optimize and automate crucial business processes with state-of-the-art webtools such as Integromat.

Your Responsibilities

- **Learn from the best:** Tackle obstacles, develop your knowledge and increase your work experience with your mentor!
- **Strive for excellence:** Strive to deliver the best possible experience for our users empowering them through effective software.
- **Build it, run it:** Build features with a “build it, run it” mindset and be responsible for testing, deployment and monitoring your code. We believe in Serverless!

Your Profile

- Graduated or about to graduate top of your class with a Bachelor’s or Master’s degree.
- Interested in working with engineering teams or becoming an engineer yourself.
- Available for a minimum of 4 months.
- Basic knowledge of coding languages like JavaScript, Python, Go or similar is a plus.
- Impressive solution-finding abilities with new, creative approaches on how to overcome challenges.

FINN

- Strong growth mindset and the motivation to continuously improve self and team performance.
- Fluency in English.

Interested in Joining Our Fast-Growing Startup?

Please upload your CV and transcripts online. Henriette Brune and Luwam Tedros are looking forward to your application!

Equal Opportunities for Everyone

FINN is an equal opportunity employer. We embrace and celebrate diversity and are committed to creating an inclusive and safe environment for all employees. Experience comes in many forms and we're dedicated to adding new perspectives to the team. We encourage you to apply even if your experience doesn't perfectly align with what we have listed. We'd love to hear from you!
